

RE: MB Docket No. 04-233

To whom it may concern

I am a listener of KLOVE, which is broadcast on the Julian, CA repeater in San Diego County on frequency 100.1 MHz. This radio program is important to me as I drive in traffic and face the perils of rush hour, to and from work. Other stations do not calm me down driving frustration like KLOVE. When I listen, my concerns melt away and I pilot my vehicle and do not worry if someone cuts me off or drives inches from my bumper.

This station is a vital asset to the San Diego area and many of my friends rely on KLOVE as I do. If a LPFM station displaced KLOVE, this would upset us greatly as we have come to rely on this nationwide broadcast as a source of hearing uplifting Christian music played without commercials.

I believe that this programming is in the interest of the public as KLOVE is played 24 hours per day and in addition to giving the music, they have a hotline that people can call 24 hours per day if they want someone to talk to. This includes those people on the brink of suicide who otherwise would go thru with their plans, but if they call in to the radio they will get a live person to talk to, who will listen to what they have to say, and in the case of a person considering suicide, they are trained to avert such a calamity. This is true of San Diego's KLOVE on 100.1 as well as all of the KLOVE stations across the country.

Please do not expand the LPFM service to take over any KLOVE stations. Thank you.
